

Manna Institute Affiliate EOI

[Manna Institute](#) welcomes expressions of interest from those with an interest in, and commitment to, rural mental health research to join us in our mission to improve the lives of regional Australians experiencing distress and mental ill-health. Manna Institute is a Commonwealth funded virtual research and training institute, established to enhance rural mental health researchers' capacity to deliver evidence-based solutions specifically for regional, rural and remote Australians. Over the past two years we have established an extensive network of senior, mid-career, early career and PhD researchers, industry partners and expanding community perspectives reference panels through our First Nations and Lived/Living Experience advisory groups. We are keen to connect with those who share this commitment and join this network of people and organisations with an interest in advancing rural mental health research. If this is something that interests you, complete the EOI information below and return to mannainstitute@une.edu.au

Name:
